DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to a latch assembly and pawl, classified in class 292, subclass 216.
- II. Claims 25-36, drawn to a latch assembly, ratchet and plural pivot point control element, classified in class 292, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as in locking any type of door, for example, without the use of an intermediate pawl. See MPEP § 806.05(d).

In response to this restriction requirement, applicant is also requested to clarify which embodiment of the specification the claims are drawn to, and also to clarify the last paragraph of claims 1 and 25 as to whether plural control elements are being positively claimed, or not.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
